DETAILED ACTION

Acknowledgment of Papers Received: Information Disclosure Statement dated 7/08/03.

Double Patenting

1. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

2. Claims 1-18 rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-18 of prior U.S. Patent No. 6,605,293. This is a double patenting rejection.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kelly et al (USPN 5,676,745) discloses polymeric implants comprising bioglass, where the implants are sintered. Ballintyn et al (USPN 4,351,069) discloses porous implant materials where the implants are sintered. Ducheyen et al (USPN 5,591,543) discloses implantable devices comprising bioglass and biologically active agents.
